Microfinance Bank

UnAudited Financial Statements
For the half-year ended 30 June 2025

CHAIRMAN'S STATEMENT

Operating environment

The first half of 2025 was marked by significant economic challenges and liquidity constraints. The business environment has been difficult and we have not been spared, but we have tried to remain resilient and grow the balance sheet.

Despite the prevailing challenges in the global economy, the Ministry of Finance, Economic Development and Investment Promotion (through the mid-term budget) is still confident the projected 6% economic growth outlined in the 2025 National Budget is achievable, on the back of a forecast 21% growth in the agricultural sector, 8% in IT, 5% in mining, as well as other sectors of the economy.

The exchange rate has remained relatively stable, with the parallel market premium at a constant 20% (down from 136% in 2024), but this has been achieved at the expense of tighter liquidity in the market.

The Reserve Bank has also announced a de-dollarisation roadmap which will be outlined in the National Development Strategy II (NDS2), later in the year and it is anticipated this will provide such much-needed clarity and assurance for the market.

Microfinance Bank performance

Our financial results for the half year ended 30 June 2025 reflect how we have been able to maintain stability and profitability, with a half year profit of ZWG 30.9 million, which was in line with the ZWG31.4 million profit for June 2024.

Our balance sheet remains stable with strong liquidity, reflecting prudent risk management of capital and an ability to absorb potential losses, support future growth, and remain resilient in the face of regulatory and macroeconomic pressure.

Compliance and regulatory

During the half year ended 30 June 2025, a rights issue of shares was concluded and USD5 million in additional equity injected into the Microfinance Bank The total equity was ZWG 250 million (USD9.3 million) at 30 June 2025, well above the USD5 million minimum capital regulatory requirement of the Reserve Bank of Zimbabwe.

The capital adequacy ratio was 81%, and the liquidity ratio 130% again, comfortably above the regulatory requirement of 15% and 30% respectively.

Directorate

Mr Gabriel Chiome resigned from the Board on 31 May 2025 as the Finance Director, and I would like to extend my gratitude to him for all his efforts and contributions during his term of office. We wish him success in his future pursuits.

The regulators approved the appointment of Mr Batsirai Dembetembe as the Finance Director effective 30th June 2025, and again wish him every success in the new role.

Dividend

No dividend has been declared for the period under review.

Outlook

The Microfinance Bank is investing in a new core banking system, a critical and timely intervention in its digital transformation strategy as new digital products are continuously being launched in the market. Once implemented, the new system will enable us to leapfrog competitors and position as the dominant force in the market in existing products as well as new product offerings. We will be better able to service our customers and offer a more truly integrated and engaged banking experience, as well as reach new customers with microfinance loans, on the back of enhanced lending capacity.

Conclusion

I would like to conclude by expressing my heartfelt thanks to all our valued customers and other stakeholders, without whom we would not have been able to maintain our performance over the year so far, in this challenging operating environment. Furthermore, I extend my gratitude to my colleagues on the Board, to the management team, and to all staff, whose collective efforts have brought us this far to the half year period to 30 June 2025.

MR I. CHAGONDA
CHAIRMAN

MANAGING DIRECTOR'S REPORT

Financial performance For the half year ended 30 June 2025, the Microfinance Bank recorded a profit after tax of ZWG 30.9 million (compared to ZWG 31.4 million for the 6 months ended 20 June 2024).

Total assets were ZWG 624.4 million in June 2025 from ZWG 697.3 million in December 2024, and total deposits also decreased by 50% and were ZWG 11.6 million at 30 June 2025 as deposits were mostly transitory with customers shunning monetary assets due to general uncertainty in the market.

The loan book marginally grew by 10% to ZWG 88 million as we continue to face increased competition in consumer sector lending, as more and more entrants targeting civil servants because of the decreased risk of default are entering the market and constraining our ability to expand.

For the period under review, the net interest margin was 58%, the efficiency ratio 36%, and the current ratio was 2.16 at 30 June 2025.
The Microfinance Bank's total equity increased from ZWG 85 million to ZWG 250 million from the 6-month profit, as well as the injection of USD 5 million by shareholders to capitalise operations up to the regulatory-required level.

Other financial liabilities over the period decreased from the conversion of debt to equity as the Microfinance Bank was capitalised by shareholders over the period.

Operations review

Growth in SME lending has been constrained as new opportunities for lending have not been easily identifiable. In order to maintain a low level of non-performing loans, new business has been limited to only lower-risk customers, with more efforts targeted towards recovery of outstanding amounts.

We are in the process of installing a new core-banking system, and this should be completed by the beginning of the fourth quarter of the year. A shift to this new system is expected to bring significant benefits in terms of operations, efficiencies and cost savings.

Outlook

The informal economy is expected to continue and grow in the foreseeable future. Informal trading, artisanal mining and manufacturing should all post increased activity and this presents an opportunity for the Microfinance Bank to create new products for this market (addressing current accessibility challenges), and helping this sector access much needed funding for real growth. Additionally, the employment created complements the Microfinance Bank's lending.

Based on the above, we expect an uptick in overall performance, with revenue growth across core and non-interest income streams.

We will maintain our cost structure at an optimum level, and the expected, continued economic stability and favourable industry outlook indicate profitability should be maintained for the rest of year.

Appreciation

I would like to express my gratitude to our valued customers and stakeholders for their continued support to the Bank. My appreciation also goes to all staff and the management team for their collective input and commitment. We have weathered the storm and turned the corner and can look forward to a better year ahead.

MR EDWIN CHAVORA
MANAGING DIRECTOR

	Everprosperous World Wide Limited	-	171 242 077

The amount owed to Everprosperous World Wide Limited was converted to equity on 30th April 2025.

21.4 Nature of transactions
Everprosperous World Wide Limited issued promissory notes for the purpose of growing the Microfinance Bank's loan book. The loans were issued at an interest rate of 60% p.a. and are repayable after 12 months from the date of drawdown.

21.5 Directors' emoluments and key management compensation
(a) Key management personnel compensation
Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the entity, directly or indirectly, and include the Managing Director, Finance Director, Head of Legal and Compliance, Head of Treasury, and Head of International Banking.

	30 June 2025 ZWG	31 December 2024 ZWG
Short term employment benefits	1 700 151	2 469 735
Post employment benefits	72 874	38 152
	1 773 026	**2 507 887**
(b) Directors' remuneration		
Included in operating expenses is the below remuneration for directors	940 156	836 040
Executive	206 320	185 749
Non-executive	**1 146 476**	**1 021 789**

The Microfinance Bank's policy is to provide fair, responsible and adequate remuneration to attract, retain, and motivate directors who possess the essential leadership qualities, skills, and experience to drive the business and ensure the sustainable success of the Microfinance Bank by achieving the strategic objectives set by the Board in the short to long term. This applies to key management as well.

Executive directors' remuneration is fixed, ie base salaries per employment contracts, with no variable incentives or options. Non-executive directors' remuneration is a fixed fee for board and committee membership.

22 Employee benefits
Pension fund
"All eligible employees contribute to the GetBucks Pension Fund (""the Pension Fund"") which is a defined contribution pension fund. The Bank has no legal or constructive obligation to pay should the Pension Fund's assets be insufficient to meet the Pension Fund's obligations. Contributions to the Pension Fund are expensed as part of staff costs.
All employees are members of the National Social Security Authority Scheme (NSSA), to which both the Bank and the employees contribute. Contributions by the employer are charged to profit and loss."

	30 June 2025 ZWG	31 December 2024 ZWG
Pension expense	23 645	19 457
NSSA expense	49 230	18 694
	72 874	**38 152**

23 Statement of compliance
The Microfinance Bankis a registered Deposit Taking Microfinance Bank and complies with the Microfinance Act (Chapter 24:29), the (Companies and Other business entities Act (Chapter 24:31) and the Exchange Control Act (Chapter 22:05).

24 Treasury and risk management
The Microfinance Bank's activities expose it to a number of financial risks. Taking risk is core to a financial services business and the Microfinance Bank aims to achieve a balance between risk and return. The risk management policies are designed to identify, measure, monitor, control and report risks using up to date information systems. Risk management is carried out by management using board approved policies and management is responsible for identifying, monitoring and mitigating financial risks faced by the Microfinance Bank. The Board of Directors assists in ensuring compliance with these policies.
The Microfinance Bank also has a compliance function whose role is to identify, record and assess compliance risks associated with the Microfinance Bank's operations.

Credit risk
Credit risk is the risk of financial loss to the Microfinance Bank if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises principally from the Microfinance Bank's loans and advances to customers. For risk management purposes, the Microfinance Bank considers and consolidates all elements of credit risk exposure such as individual obligor default employer and default risk. Credit risk and exposure to loss are inherent parts of the Microfinance Bank's business stemming from cash and cash equivalents and loans and advances to customers.

The provision of unsecured loans to individuals and business is the main activity of the Microfinance Bank, hence exposure to credit risk and its management are key considerations of the business. Customer credit risk is mitigated by the utilisation of payroll collection models for unsecured individual loans which ensures that the loans are collectable during their tenure, and collateral security for SME and mortgage loans.

The Microfinance Bank's credit department periodically prepares detailed reports on the quality of the customers and adequacy of loan impairment allowance for review.

To maintain an adequate allowance for credit losses, the Microfinance Bank generally provides for a loan or a portion thereof, when a loss is probable. The objective of our credit risk management is to ensure that credit is granted to creditworthy clients in order to collect on loans disbursed.

The Microfinance Bank mainly provides loans to gainfully employed individuals that work for companies, mostly the public service, that have concluded a deduction agreement. In terms of the agreement the employer deducts loan instalments from customers' salaries based on pre-agreed terms. This mitigates the risk of default on consumer loans.

Credit policies, procedures and limits
The Microfinance Bank has sound and well-defined policies, procedures and limits which are reviewed and approved by the Board of Directors and strictly implemented by management. Credit risk limits include delegated approval and write-off limits for management and Board Credit Committee, individual account limits and concentration. To ensure that the Microfinance Bank only lends to credit worthy customers, checks are conducted to verify identity, employment status and affordability of loan products being applied for, before loans are disbursed. Similar checks are conducted for SME's and, where deemed necessary, collateral or credit insurance is obtained to mitigate risk of default.

Credit risk mitigation and hedging
As part of the Microfinance Bank's credit risk mitigation and hedging strategy, various types of collateral is taken by the Microfinance Bank. These include mortgage bonds over residential, commercial and industrial properties, cession of book debts and the underlying movable assets financed.

Collateral held for exposure
An estimate of the fair value of collateral and other credit enhancements held against loans and advances to customers are shown below based on their collateral types :-

Collateral types	Segment	30 June 2025 ZWG	31 December 2024 ZWG
Mortgage Bonds	SME	105 790 561	61 390 508
Guarantees	SME	-	-
Cash cover	SME	-	-
Exposure credit guarantees	SME	-	-
Security Sharing Agreement	SME	-	-
Value of collateral		**105 790 561**	**61 390 508**

The collateral above is solely for the SME loans. The gross carrying amount of the assets is ZWG 43 741 462 (31 December 2024: ZWG 40 927 006).

This implies that collateral cover is 242% (31 December 2024: 150%).
The Microfinance Bank has an obligation to return it once respective loans have been settled.
None of the collateral was sold or repledged.

There is no collateral for the consumer segment, although all loans to this segment are to employees of the government of Zimbabwe.
Maximum exposure to credit risk without taking into account collateral.

UnAudited Financial Statements

For the half-year ended 30 June 2025

24 Treasury and risk management (Continued)

Credit policies, procedures and limits	30 June 2025 ZWG	31 December 2024 ZWG
Cash and cash equivalents (excluding cash on hand)	389 427 691	372 758 218
Loans and advances to customers	87 978 126	80 146 700
Total credit risk exposure	**477 405 817**	**452 904 918**

Where financial instruments are recorded at fair value the amounts shown above represent the current risk exposure but not the maximum risk exposure that could arise in the future as a result of changes in values.

Other credit enhancements

Customer credit risk for consumer loans is mitigated by the utilisation of payroll collection models. In addition, all loans granted are covered by credit life insurance that pays the Microfinance Bank in case of death (or permanent disability) of the customer.

Loans with renegotiated terms

Loans with renegotiated terms are loans that have been restructured due to deterioration in the borrower's financial position and where the Microfinance Bank has made concessions that it would not otherwise consider. Once the loan is restructured it remains in this category independent of satisfactory performance after restructuring. There were no renegotiated loans and advances to customers during the period under review.

Allowances for impairment

The loss allowance recognised in the period is impacted by a variety of factors, as described below:

- transfers between Stage 1 and Stages 2 or 3 due to financial instruments experiencing significant increases (or decreases) of credit risk or becoming credit-impaired in the period, and the consequently "step up" (or "step down") between 12-month and Lifetime ECL;
- additional allowances for new financial instruments recognised during the period, as well as releases of financial instruments de-recognised in the period;
- impact on the measurement of ECL due to changes in PDs, EADs and LGDs in the period, arising from regular refreshing of inputs to models;
- impacts on the measurement of ECL due to changes made to models and assumptions;
- financial assets derecognised during the period and write-offs of allowances related to assets that were written off during the period.

Write-off policy

Financial assets are only written off when the entity has no reasonable expectation of recovery. The Microfinance Bank write-off policy states that a loan with a contractual maturity of more than 1 month will be written off after 365 days of non-payment. Loans with a contractual maturity of 1 month are written off after 180 days of non-payment.

The Microfinance Bank holds collateral against loans and advances to customers in the form of mortgage interest over property, other registered securities over assets, charges against receivables and guarantees. Estimates of fair value are based on the value of collateral assessed at the time of borrowing, and generally are not updated except when a loan is individually assessed as impaired. Assets written off are not subject to enforcement activity. Partial write-offs may be possible in cases where collateral security held is inadequate to expunge the debt in full.

Liquidity risk

Liquidity risk is the risk that the Microfinance Bank will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. Liquidity risk arises when assets and liabilities have differing maturities.

The liquidity risk is managed by reviewing the Microfinance Bank's liquidity profile by monitoring the difference in maturities between assets and liabilities and analysing the future level of funds required based on various assumptions, including its ability to liquidate investments and participate in money markets.

Assumptions used take into account loan collections, loan maturities, and operational costs. The Company's liquidity as a lending institution is dependent on the ability to collect instalments from advances made to customers. In case of shocks, delays or inability to collect instalments the Microfinance Bank relies on loan facilities from other financial institutions to ensure that it can meet its obligations.

Market risk

This is the risk of a change in the actual or effective market value or earnings of a portfolio of financial instruments caused by adverse movements in market variables such as equity, bond and commodity prices, currency exchange rates and interest rates, credit spreads, recovery rates, correlations and implied volatilities in all of the above.The objective of market risk management is to manage and control market risk exposures within acceptable parameters while optimising the return on risk.

Interest rate risk

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the value of financial instruments will fluctuate because of changes in market interest rates. The Microfinance Bank's main interest rate risk arises from long-term borrowings which are issued at fixed rates. These expose the Bank to cash flow interest rate risk, which is partially offset by having a short term portfolio as the main asset in the, thereby reducing net interest expense.

Foreign Currency Exchange Risk

The Microfinance Bank takes on exposure to the effects of fluctuations in the prevailing foreign currency exchange rates on its financial position and cash flows. Foreign exchange risk arises from having transactions and balances denominated in currencies that are not the functional and presentation currency, the 'ZWG Dollar'. The Microfinance Bank does not use hedge instruments to manage foreign currency exchange risk.

Capital risk management

The Microfinance Bank's objectives when managing capital, which is a broader concept than the 'equity' on the face of the statement of financial position, are:

- to comply with the capital requirements set by the Microfinance Banking regulators;
- to safeguard the Microfinance Bank's ability to continue as a going concern so that it can continue to provide returns for shareholders; and
- to maintain a strong capital base to support the development of its business.

The Microfinance Bank's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. The impact of the level of capital on shareholders' return is also recognised and the Bank recognises the need to maintain a balance between higher returns that might be possible with greater gearing, and the advantages and security afforded by a sound capital position.

The Bank's capital resources should therefore be adequate to absorb losses such as operating losses, and capital losses on investments. As long as net losses can be fully offset against capital invested by the Bank's owners, the legal claims of clients or other creditors are not compromised and the Bank can continue to function without interrupting its operations. The shareholders' equity for the Bank at 30 June 2025 was ZWG 250 014 834 (December 2024: ZWG85 012 064) which translates to USD9 278 469 (December 2024: USD3 295 233), and this was in compliance with the RBZ's minimum capital requirement of USD5 000 000 equivalent, after a rights issue injected USD5 000 000 equivalent on 30th April 2025. The gearing ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including current and non-current borrowings) less cash and cash equivalents as shown in the statement of financial position. Total capital is calculated as "equity" as shown in the statement of financial position plus net debt.

Total borrowings	30 June 2025 ZWG	31 December 2024 ZWG

Capital adequacy and the use of regulatory capital is monitored daily by the Microfinance Bank's management and the directors, employing techniques based on guidelines developed by the Basel Committee as implemented by the Reserve Bank of Zimbabwe for supervisory purposes. The Microfinance Bank's regulatory capital is managed by management and comprises three tiers;

• **Tier 1 Capital:** capital representing a permanent commitment of funds by the shareholders of the Microfinance Bank (net of any loans and advances given to insiders) which is available to meet losses incurred without imposing a fixed unavoidable charge on the institution's earnings, and includes such of the following elements as are available to the Microfinance Bank after making any required deductions
(a) issued and fully paid up ordinary shares or common stock;
(b) paid up non-cumulative irredeemable preference shares;
(c) reserves consisting of

(i) non-repayable share premiums;
(ii) disclosed reserves created by a charge to net income in the financial year immediately preceding the current one;
(iii) published retained earnings for the current year, including interim earnings, where these have been verified by external auditors;

(d) minority interests in subsidiaries arising on consolidation;

• **Tier 2 Capital:** comprises impairment allowance, revaluation reserves, undisclosed reserves, hybrid capital instruments and subordinated term debt.

Tier 1 Ratio	80%	32%
Tier 2 Ratio	1%	1%
Capital adequacy ratio	81%	33%

The Microfinance Bank has 3 classes of risk weighted assets. They are Credit, Market, and Operational risk assets which are components of the Capital Adequacy Ratio ("CAR") calculation. Risk weighted assets are used to determine the minimum amount of capital that must be held by banks to reduce the risk of failure. The capital requirement is based on a risk assessment for each type of bank asset. The required Tier 1 ratio is 12%, Tier 2 is 15%. This is based on operational guidelines for Deposit taking Microfinance Institutions.

Capital charges are assigned as below:

Credit risk capital
Credit risk capital is subject to guidelines provided by the regulator which are based on Basel 1 principles. On this approach the Microfinance Bank's book exposures are categorised into broad classes of assets with different underlying risk characterised. Risk components are transformed into risk weighted assets using predetermined exposure and loss probability factors. Capital requirements for credit risk are derived from the risk weighted assets.

Market risk capital
Market risk capital is assessed using regulatory guidelines which consider the risk characteristics of the different trading book assets. Risk components are transformed into risk weighted assets and, therefore, capital requirements, based on predetermined exposure and loss probability factors.

Operational risk capital
This is the risk of losses arising from inadequate or failed internal processes, people and/or systems or from external events. Practices to minimise operational risk are embedded across all transaction cycles. Departmental key risk indicators are used for the purpose of identifying major risks in the operating environment and methods of mitigating the risks. The Microfinance Bank employs the standardised approach to determine capital required to cover operational risk. Each function carries out a risk and control assessment of their processes on a regular basis. The assessment results are reviewed by the Executive Committee of the Microfinance Bank.

Total capital
Total capital for the Microfinance Bank is assessed to be sufficient to support current business and planned capital projects. Growth in advances will continue to be pursued in such a way as to achieve economic asset yields.

Risk ratings
The Reserve Bank of Zimbabwe conducted an offsite inspection on the Microfinance Bank in the last quarter of 2024 and was assigned a composite rating of '4'

CAMELS RISK MATRIX - 31 DECEMBER 2024 RBZ OFFSITE EXAMINATION

	Composite	Capital adequacy	Capital adequacy	Asset Quality	Earnings	Liquidity	Sensitivity to market risk
GetBucks Microfinance Bank Limited	4	4	4	4	4	3	3

Key					
1. Strong	2. Satisfactory	3. Fair		4. Substandard	

CAMEL* Component	2024
Capital Adequacy	4
Asset/Portfolio quality	4
Management, Corporate Governance and Outreach	4
Earnings	3
Liquidity and Funds Management	3

*CAMELS is an acronym for Capital Adequacy, Asset quality, Management, Earnings, Liquidity and Sensitivity.
CAMELS rating system uses a rating scale of 1-5, where '1' is Strong, '2' is Satisfactory, '3' is Fair, '4' is Weak and '5' is Critical.

Strategic Risk
Strategic risk is the risk of a financial loss or of reputational harm arising from inappropriate strategic orientations, improper execution, or ineffective response to economic, financial, or regulatory changes. The corporate strategic plan is developed by the Senior Leadership Team, in alignment with the Microfinance Bank's overall risk appetite, and approved by the Board. Once approved, the initiatives of the strategic plan are monitored regularly to ensure that they are progressing. If not, strategies could be reviewed or adjusted if deemed appropriate. In addition, the Microfinance Bank has a specific Board-approved policy for strategic investments, which are defined as purchases of business assets or acquisitions of significant interests in an entity for the purposes of acquiring control or creating a long-term relationship. As such, acquisition projects and other strategic investments are analysed through a due diligence process to ensure that these investments are aligned with the corporate strategic plan and the Microfinance Bank's risk appetite.

Reputational Risk
Reputational risk is the risk that the Microfinance Bank's operations or practices will be judged negatively by the public, whether that judgment is with or without basis, and adversely affecting the perception, image, or trademarks of the Microfinance Bank and potentially resulting in costly litigation or loss of income. Reputation risk generally arises from a deficiency in managing another risk. The Microfinance Bank's reputation may, for example, be adversely affected by non-compliance with laws and regulations or by process failures. All risks must therefore be managed effectively in order to protect the Microfinance Bank's reputation. The Microfinance Bank's corporate culture continually promotes the behaviours and values to be adopted by employees. Ethics are at the heart of everything we do. To fulfil our mission, put people first, and continue to build a strong Microfinance Bank, we must maintain the highest degree of work ethic. Our Code of Conduct outlines what is expected from each employee in terms of ethical behaviour and rules to be followed as they carry out their duties.

Legal and compliance risk
Legal and compliance risk is the risk from failure to adhere to legal and regulatory obligations. The Microfinance Bank manages this risk through dedicated Legal and Compliance units, as well as monitoring and review by the Board of Directors, and Risk and Compliance Committee. However, during the period, the Microfinance Bank was fined USD$20,300 by the Reserve Bank of Zimbabwe on 27th February 2025 for failure to submit regulatory returns and information.

Independent credit rating
In June 2025, the Microfinance Bank was externally evaluated based on an ISO 9001:2015 standard, independent methodology for financial institutions, and given a credit rating of BB.

Risk Assessment System ("RAS")
Summary RAS -Ratings

Legal Risk	Low	Acceptable	Low
Reputational Risk	Low	Acceptable	Low
Compliance Risk	Moderate	Acceptable	Moderate
OVERALL RATING	MODERATE	MODERATE	MODERATE

Interpretation of risk matrix level of inherent risk
Low - reflects lower than average probability of an adverse impact on a banking institution's capital and earnings. Losses in a functional area with low inherent risk would have little negative impact on the banking institution's overall financial condition.
Moderate - could reasonably be expected to result in a loss which could be absorbed by a banking institution in the normal course of business.

High - reflects a higher-than-average probability of potential loss. High inherent risk could reasonably be expected to result in a significant and harmful loss to the banking institution.

Adequacy of risk management systems
Weak - risk management systems are inadequate or inappropriate given the size, complexity and risk profile of the banking institution. Institution's risk management systems are lacking in important ways and therefore a cause of more than normal supervisory attention. The internal control systems will be lacking in important aspects, particularly as indicated by continued exceptions or by the failure to adhere to written policies and procedures.

Acceptable - management of risk is largely effective but lacking to some modest degree. While the institution might be having some minor risk management weaknesses, these have been recognised and are being addressed. Management information systems are generally adequate.

NOTES TO THE FINANCIAL STATEMENTS
For the half-year ended 30 June 2025

Strong - management effectively identifies and controls all types of risk posed by the relevant functional areas or per inherent risk.

The Board and senior management are active participants in managing risk and ensure appropriate policies and limits are put in place. The policies comprehensively define the Microfinance Bank's risk tolerance. Responsibilities and accountabilities are effectively communicated.

Overall composite risk
Low - would be assigned to low inherent risk areas. Moderate risk areas may be assigned to a low composite risk where internal controls and risk management systems are strong and effectively mitigate much of the risk.

Moderate - risk management systems appropriately mitigate inherent risk. For a given low risk area, significant weaknesses in the risk management systems may result in a moderate composite risk assessment. On the other hand, a strong risk management system may reduce the risk so that any potential financial loss from the activity would have only a moderate negative impact on the financial condition of the organisation.

High - risk management systems do not significantly mitigate the high inherent risk. Thus, the activity could potentially result in a financial loss that would have a significant impact on the Microfinance Bank's overall condition.

Direction of overall composite risk
Increasing- based on the current information, risk is expected to increase in the next 12 months.

Decreasing - based on current information, risk is expected to decrease in the next 12 months.

25 Contingent liabilities
There were no contingent liabilities at 30 June 2025 (31 December 2024: nil).

26 Capital commitments
There was no authorised and contracted, or authorised but uncontracted capital expenditure at 30 June 2025 (31 December 2024 : nil)

27 Going concern
The Directors believe that the Microfinance Bank has adequate financial resources to continue in operation for the foreseeable future and accordingly the interim financial statements have been prepared on a going concern basis.
The Directors have satisfied themselves that the Microfinance Bank is in a sound financial position and has access to sufficient financing facilities to meet its foreseeable cash requirements.
There are no material changes that may adversely impact the Microfinance Bank, and there has not been any material non-compliance with statutory or regulatory requirements, nor are there any pending changes to legislation which may affect the going concern/

28 Events after the reporting date
There were no subsequent events requiring disclosure or recognition in the interim financial statements.

29 Corporate Governance
GetBucks Microfinance Bank Limited adheres to governance practices as stipulated by the Companies and Other Business Entities Act, the Reserve Bank of Zimbabwe Operational Guidelines, and the King IV Code. The Board has set up the Audit and Risk Committee, Remuneration Committee, Credit Committee, Loans Review Committee and the Nominations Committee to assist in the discharge of its duties and responsibilities.

Following the issue of Prudential Standard No.02-2025/BSSFS: Corporate Governance - Guideline No. 1 by the Reserve Bank of Zimbabwe, the board committees will be reconstituted as follows:
- Audit Committee
- Risk Committee
- Remuneration/Compensation Committee
- Credit Committee
- Loans Review Committee
- Nominations Committee

This is to better assist the Board to discharge its responsibilities by having more oversight and supervision of the Bank and its operations.

This is effective 1st September 2025.

The Board has also appointed management committees to assist in the execution of its mandate, namely, the Asset and Liability Committee('ALCO') and the Executive Committee ('EXCO').

Audit and Risk Committee
The Committee oversees the Company's financial reporting process, monitoring the integrity and appropriateness of the Company's financial statements, evaluating the adequacy of the Company's financial and operational processes, compliance,internal controls and risk management processes and the selection, compensation, independence and performance of the Company's external and internal auditors. The Committee meets at least four times a year and regularly with the internal andexternal auditors. For independence and objectivity, both internal and external auditors have unrestricted access to the committee.

Loans Review Committee
The Loans Review Committee assesses compliance of the loan book with the lending policy and regulations. The Committee conducts loan reviews independent of any person or Committee responsible for sanctioning credit.

Credit Committee
The Credit Committee's main responsibilities are to consider loan applications beyond the discretionary limits of the Executive Credit Committee and to direct the formulation of, review and monitor the credit principles and policies of the Microfinance Bank.

Remuneration Committee
The Committee is responsible for setting the Microfinance Bank's remuneration philosophy and reviews the overall remuneration structures of the Microfinance Bank, including all material remuneration proposals and packages for Executive Directors and senior personnel.

Executive Committee
The Executive Committee is the operational management forum responsible for the delivery of the Bank's operational plans.
It acts as a link between the Board and management and is responsible for implementation of operational plans, annual budgeting and periodic review of strategic plans, as well as identification and management of key risks. The Executive Committee is made up of the Managing Director, Finance Director, Head Treasury, Head of Risk, and Company Secretary.

29.1 Directors
The directors in office during the half year and at the date of this report are as follows:

Director	Position	Nationality	Changes
Mr. Innocent Chagonda	Non-Executive Chairperson (Independent)	Zimbabwean	No changes
Mr. Gamuchirai Nyamuzinga	Non-Executive Director (Independent)	Zimbabwean	No changes
Ms. Shaleetha Mahabeer	Non-Executive Director	Zimbabwean	No changes
Mr. Edwin Chavora	Managing Director	Zimbabwean	No changes
Mr. Gabriel Chiome	Finance Director	Zimbabwean	Resigned in May 2025
Mr. Batsirai Dembetembe	Finance Director	Zimbabwean	Appointed in June 2025

29.2 Meeting Attendance

Director's Name	Main Board	Audit & Risk	Loans Review	Credit	Remuneration
I Chagonda	1	1	1	1	1
G Nyamuzinga	1	1	1	1	1
S Mahabeer	1	1	1	1	1
E Chavora *	1	1	1	1	1
B Dembetembe *	1	1	1	1	1

* Executive Director

29.3 Board and Directors evaluation
The Board is required to conduct an annual evaluation process which assesses the performance and effectiveness of individual directors, the Board Chairperson, Committees and overall performance of the Board. Every Board member is expected to makean assessment of the quality of board oversight. Board members also perform peer review of each member in addition to the individual member review done by the Chairperson of the Board.
This will be performed in the fourth quarter of the year by the Nominations Committee.

29.4 Directors' interests in contracts
During the financial year, no contracts were entered into where directors or officers of the Microfinance Bank had an interest and which significantly affected the business of the Microfinance Bank.

30 Holding Company
The Bank's holding Company is Everprosperous Worldwide Limited which holds 99.66% (2024: 99.16%) of the Microfinance Bank's equity. The transaction was conditionally approved by the Registrar of Microfinance Institutions in May 2023, and the Microfinance Bank was in April 2025 given up to 31 March 2028 to regularise this position.

By Order of The Board

Mr. Muchineripi Chigwendere (Company secretary).
Registered Office: First Floor, Unity Court Building, 64 Union Avenue, Harare, Zimbabwe.
