Get Bucks Microfinance Bank

A REGISTERED DEPOSIT TAKING MICROFINANCE INSTITUTION

Abridged Audited Financial Statements

For the year ended 31 December 2025

CHAIRMAN'S STATEMENT

I am pleased to report another year of good performance for Getbucks Microfinance Bank Limited for the financial year ended 31 December 2025, and the results continue to reflect the hard work of our team, and the strength and depth of our operations.

Operating environment

The business environment has continued to be difficult, putting pressure on the institution and our customers. The Reserve Bank maintained a tight monetary policy stance with the policy rate kept at 35%, statutory reserve requirements unchanged at 30% for demand deposits and 15% for savings and fixed deposits. The local currency component of broad money grew an average 2.7% on a monthly basis in 2025 compared to 40% prior years. Consequently, annual ZWG inflation fell to 15% in December 2025. Foreign currency receipts for the year increased by 22% to US$16.2 billion in 2025, up from US$13.3 billion in 2024, driven by record exports of gold, tobacco and platinum, as well as firming international prices on the same. As a result, the exchange rate remained stable throughout the year, averaging ZWG 26 to the US dollar.

Financial position

Our balance sheet grew by 5% in 2025 to ZWG 732 726 931 from ZWG 697 345 973 in 2024. The balance sheet remains stable with strong liquidity, as reflected in the current ratio improvement from 1.23 times in 2024 to 1.82 times in 2025.
The capital position strengthened from ZWG 85 012 061 in 2024 to ZWG 257 521 356 in 2025. Capital is sufficient to absorb potential losses, support future growth, and remain resilient in the face of any possible regulatory and macroeconomic pressures.

Compliance and regulatory issues

During the year, a rights issue of shares was concluded and USD5 million in additional equity was injected into the institution. At 31 December 2025, core capital was ZWG 257 million (USD9.9 million), a 200% increase on the ZWG 85 million (USD3.3 million) in the previous year, but more importantly, now in compliance with the USD5 million minimum capital regulatory requirement, and with a capital adequacy ratio of 79% - well above the regulatory minimum threshold of 15%.

Directorate

Mr Gabriel Chiome resigned from the Board on 31 May 2025 as the Finance Director, and I would like to extend my gratitude to him for his contributions during his term of office. We wish him success in his future pursuits. The regulators approved the appointment of Mr Batsirai Dembetembe as the Finance Director effective 30th June 2025, and again I wish him every success in the role. Furthermore, Mr Dipesh Shah was approved by the regulator as a director in October 2025 and consequently joined the board as a non-executive member. We look forward to his input and insights as we deal with the challenges ahead.

Dividend

No dividend has been declared for the financial year ended 31 December 2025.

Outlook

Looking ahead, the Board remains focused on sustainable growth and creating long-term value. Our priority remains improving operational efficiency and profitability, with several new projects on the horizon, all anchored on anupgrade of our technological platforms. Our improved Capital position will enable the business to compete strongly in an increasingly competitive space for microfinance, deposits and digital products.

Conclusion

I would like to extend my sincere gratitude to my fellow Board members for their strategic guidance, to our management team and all our staff for their dedication and hard work over the year, to our shareholders for their faith and support, and most importantly to our clients, who have been with us over this turbulent period. I know I can continue to count on your support as we chart the course for the year ahead.

MR I. CHAGONDA
CHAIRMAN

MANAGING DIRECTOR'S REPORT

Performance Outturn

Net Income came down to ZWG 112 702 785 in 2025 from ZWG 130 589 014 in 2024. This was largely due to the ZWG 38 715 334 drop in Other Income as there were no revaluation gains in investment property in 2025A bbatterfly Net Interest Income improved from ZWG 8 688 773 in 2024 to ZWG 21 218 974. Fee and commission income also improved from ZWG 20 731 285 in 2024 to ZWG 29 030 189 in 2025. Operating Expenses shot up to ZWG 46 500 768 in 2025 from ZWG 23 526 656 in 2024 largely as a result of currency conversion effects in 2024. Profit after tax came down to ZWG 38 430 295 in 2025 from ZWG 77 217 643 in 2024. However, though the profit came down, it is now more reflective of the core operations of the business. The improved capital position after the injection of capital into the business by the Shareholders by way of a rights issue in 2025 will allow the business to underwrite more business and increase profitability going forward.

Outlook

Monetary Authorities have reiterated that they will stay the course. Looking ahead we should anticipate continued tight monetary conditions and a stable exchange rate. Higher inflation should be expected because of the increases in energy costs as a result of the war in the Middle East. The Institution will look to improve operational efficiencies as a means to mitigate anticipated rising costs, grow the customer base and increase revenues.

Technological advancements

The institution will push to complete the revamping of our ICT platforms by the end of the second quarter of 2026.

Appreication

I would like to take this opportunity to sincerely thank our valued customers and stakeholders for their continued support and steadfast commitment to the institution. I also extend my heartfelt appreciation to the entire GetBucks staff and management team for their collective efforts, which have been instrumental in achieving this performance for the year ended 31 December 2025.
In closing, I am profoundly appreciative of the Board's invaluable advice and direction, for which I remain truly grateful.

MR EDWIN CHAVORA
MANAGING DIRECTOR

AUDITOR'S STATEMENT

These abridged financial statements derived from the audited financial statements of Getbucks Microfinance Bank Limited for the financial year ended 31 December 2025, and should be read together with the complete set of audited annual financial statements for the year ended 31 December 2025, which have been audited by Crowe Chartered Accountants (Zimbabwe) and the auditor's report signed by Albert Tirivangani, Registered Public Auditor 0584.

The auditor's report includes a section on key audit matters that in the auditor's professional judgment, were of the most significance in the audit of the annual financial statements. The key audit matters were with respect to the rights issue of shares, resulting in an injection of US$5 million worth of Gold Backed Digital Tokens from the shareholders; and the calculation of the loan impairment and expected credit losses on the loans and advances to customers.

The auditor's opinion was not modified in respect of these matters.

The auditor's report on the financial statements and the full set of audited inflation-adjusted annual financial statements, are available for inspection at the institution's registered office.

Abridged Audited Financial Statements

For the year ended 31 December 2025

RXD GB 20253052000B

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 31 December 2025

1 (a) General information

GetBucks Microfinance Bank Limited ("GetBucks" or "the Microfinance Bank") is registered as a Deposit Taking Microfinance Bank by the Reserve Bank of Zimbabwe, under the Microfinance Act (Chapter 24:29). The Microfinance Bank is a limited liability Company incorporated and domiciled in Zimbabwe. The Microfinance Bank's business is conducted in Zimbabwe. The address of its registered office is First Floor, Unity Court, 64 Union Avenue, Harare, Zimbabwe.

(b) Basis of preparation

(i) Compliance with International Financial Reporting Standards

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") and in the manner required by the Companies and other Business Entities Act (Chapter 24:31).

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Microfinance Bank's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in section 3 of the accounting policies.

The financial statements have been prepared based on the statutory records that are maintained under the historical cost basis and adjusted for the effects of applying IAS 29. The financial statements are presented in Zimbabwean dollars and all values are rounded to the nearest dollar.

(ii) Going Concern

The Directors have a reasonable belief that the Company has adequate capacity and resources to continue in operation for the foreseeable future. The Company therefore, continues to adopt the going concern basis in preparation of the financial statements.

(c) Accounting Policies

The accounting policies applied in the preparation of these audited abridged financial statements are consistent with those followed in the
preparation of the Company's annual finanical statements for the year ended 31 December 2025.

(i) Presentation Currency

Items included in the financial statements were measured using the currency of the primary economic environment in which the Company operates ("the functional currency"). The audited abridged financial statements are presented in Zimbabwe Gold ("ZWG"), which is the Company's presentation currency for the year ended 31 December 2025, and also as prescribed by Statutory Instrument 33 of 2019 and Statutory Instrument 142 of 2019.

(ii) Financial Reporting in Hyperinflation Economies

Items included in the financial statements were measured using the currency of the primary economic environment in which the Company operates ("the functional currency"). The audited abridged financial statements are presented in Zimbabwe Gold ("ZWG"), which is the Company's presentation currency for the year ended 31 December 2025, and also as prescribed by Statutory Instrument 33 of 2019 and Statutory Instrument 142 of 2019.

(a) NEC Provisions
Non-management employees of the Bank are members of the National Employment Council (NEC) for the banking undertaking, a statutory body regulating employment conditions, salaries, and levies in the banking sector. In January 2025, the NEC awarded all employees in the banking sector a 10% increase in salary, which the bank has not effected. A provision has been recognised for this potential liability for backpay and accrued remuneration, based on the salaries awarded by the NEC.

(b) RBZ Annual fee
The Reserve Bank of Zimbabwe introduced a new annual levy for deposit-taking microfinance institutions with effect from the 2025 financial year. The fee is based on the value of assets on the bank's books on 31 December 2025, and is payable to the regulator by 31 March 2026.A provision has therefore been recognised at the balance sheet date based on an estimate of the asset value.

(c) Audit fees
A provision has been recognized for audit fees relating to the annual audit of the financial statements for the year ended 31 December 2025, as well as the cost of internal audit services outsourced, based on the estimated cost.

22.4 Nature of transactions

(a) Related parties borrowings

Ever Prosperous Worldwide Limited issued promissory notes for the purpose of growing the GetBucks' loan book. The fixed term notes were originally issued in 2023 with an interest rate of 60% p.a., repayable 12 months from the date of drawdown, and secured by the Bank's loan book. They were rolled over on the same terms and conditions on maturity and since.

(b) Related parties payables

The Bank was holding funds due to Al-Shams Global, as well as Gold Backed Digital Tokens at the Reserve Bank of Zimbabwe on their behalf. No interest is charged on these holdings.

22.5 Key management personnel compensation

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the entity, '(directly or indirectly), and include the Managing Director, Finance Director, Head of Legal and Compliance, Head of Treasury, and Head of 'International Banking.

	2 650 040	**1 019 591**	**2 609 290**	**886 371**

The Microfinance Bank's policy is to provide fair, responsible and adequate remuneration to attract, retain, and motivate directors who possess the essential leadership qualities, skills, and experience to drive the business and ensure the sustainable success of the Microfinance Bank by achieving the strategic objectives set by the Board in the short to long term. This applies to key management as well. Executive directors' remuneration is fixed, ie base salaries per employment contracts, with no variable incentives or options. Non-executive directors' remuneration is a fixed fee for board and committee membership.

23 Employee benefits

Pension fund

All eligible employees contribute to the GetBucks Pension Fund (the Pension Fund) which is a defined contribution pension fund. 'The Microfinance Bank has no legal or constructive obligation to pay should the Pension Fund's assets be insufficient to meet the Pension Fund's 'obligations. Contributions to the Pension Fund are expensed as part of staff costs. 'All employees are members of the National Social Security Authority Scheme (NSSA), to which both the Microfinance Bank and the employees 'contribute. Contributions by the employer are charged to profit and loss.

24 Statement of compliance

The Microfinance Bank is registered Deposit Taking Microfinance Bank and complies with the Microfinance Act (Chapter 24:29), the Companies and Other business entities Act (Chapter 24:31) and the Exchange Control Act (Chapter 22:05).

25 Treasury and risk management

The Microfinance Bank's activities expose it to a number of financial risks. Taking risk is core to a financial services business and GetBucks aims to achieve a balance between risk and return. The risk management policies are designed to identify, measure, monitor, control and is responsible for identifying, report risks using up to date information systems. Risk management is carried out by management using board-approved policies and management monitoring and mitigating financial risks faced by GetBucks. The Board of Directors assists in ensuring compliance with these policies. GetBucks also has a compliance function whose role is to identify, record and assess compliance risks associated with the GetBucks's operations.

Credit risk

Credit risk is the risk of financial loss to GetBucks if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises principally from the GetBucks's loans and advances to customers. For risk management purposes, GetBucks Bank considers and consolidates all elements of credit risk exposure such as individual obligor default employer and default risk. Credit risk and exposure to loss are inherent parts of the Microfinance Bank's business stemming from cash and cash equivalents and loans and advances to customers.

The provision of unsecured loans to individuals and business is the main activity of GetBucks, hence exposure to credit risk and its management are key considerations of the business. Customer credit risk is mitigated by the utilisation of payroll collection models for unsecured individual loans which ensures that the loans are collectable during their tenure, and collateral security for SME and mortgage loans. The Microfinance Bank's credit department periodically prepares detailed reports on the quality of the customers and adequacy of loan impairment allowance for review.

To maintain an adequate allowance for credit losses, GetBucks generally provides for a loan or a portion thereof, when a loss is probable. The objective of our credit risk management is to ensure that credit is granted to creditworthy clients in order to collect on loans disbursed.

The Microfinance Bank mainly provides loans to gainfully employed individuals that work for companies and mostly the public service that have concluded a deduction agreement. In terms of the agreement the employer deducts loan instalments from customers' salaries-based on pre-agreed terms. This mitigates the risk of default on consumer loans.

NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December 2025

Credit policies, procedures and limits

GetBucks has sound and well-defined policies, procedures and limits which are reviewed and approved by the Board of Directors and strictly implemented by management. Credit risk limits include delegated approval and write-off limits for management and Board Credit Committee, individual account limits and concentration. To ensure that GetBucks only lends to credit-worthy customers, checks are conducted to verify identity, employment status and affordability of loan products being applied for, before loans are disbursed. Similar checks are conducted for SME's and, where deemed necessary, collateral or credit insurance is obtained to mitigate risk of default.

Credit risk mitigation and hedging

As part of GetBucks's credit risk mitigation and hedging strategy, various types of collateral is taken by GetBucks. These include mortgage bonds over residential, commercial and industrial properties, cession of book debts and the underlying movable assets financed.

Collateral held for exposure

An estimate of the fair value of collateral and other credit enhancements held against loans and advances to customers are shown below, based on their collateral types :-

Collateral types	Segment	2025 ZWG	2024 ZWG
Mortgage Bonds	SME		
Value of collateral		231 955 690	61 390 508

The collateral above is solely for the SME loans and the gross carrying amount of the assets is ZWG 61 390 508. The gross loan book for SME is ZWG 40 927 006. This implies that collateral cover is 150%. There is no collateral for the consumer segment. None of the collateral was sold or repledged. GetBucks has an obligation to return it once respective loans have been settled. Maximum exposure to credit risk without taking into account collateral

	2025 ZWG	2024 ZWG
Cash and cash equivalents (excluding cash on hand)	307 733 585	372 758 229
Loans and advances to customers	79 271 371	80 146 700
Total credit risk exposure	387 004 956	452 904 929

Where financial instruments are recorded at fair value the amounts shown above represent the current risk exposure but not the maximum risk exposure that could arise in the future as a result of changes in values.

Other credit enhancements

Customer credit risk is mitigated by the utilisation of payroll collection models. In addition, all consumer loans granted to customers are covered by credit life insurance that pays GetBucks in case of death or permanent disability of the customer.

Loans with renegotiated terms

Loans with renegotiated terms are loans that have been restructured due to deterioration in the borrower's financial position and where the GetBucks has made concessions that it would not otherwise consider. Once the loan is restructured it remains in this category independent of satisfactory performance after restructuring. There were no renegotiated loans and advances to customers during the year (December 2024: nil).

Allowances for impairment

The loss allowance recognised in the period is impacted by a variety of factors, as described below:

- transfers between Stage 1 and Stages 2 or 3 due to financial instruments experiencing significant increases (or decreases) of credit risk or becoming credit-impaired in the period, and the consequently "step up" (or "step down") between 12-month and Lifetime ECL;

NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December 2025

- additional allowances for new financial instruments recognised during the period, as well as releases of financial instruments de-recognised in the period;
- impact on the measurement of ECL due to changes in PDs, EADs and LGDs in the period, arising from regular refreshing of inputs to models;
- impacts on the measurement of ECL due to changes made to models and assumptions;
- financial assets derecognised during the period and write-offs of allowances related to assets that were written off during the period.

Write-off policy

Financial assets are only written off when the entity has no reasonable expectation of recovery. Getbucks write-off policy states that a loan with a contractual maturity of more than 1 month will be written off after 365 days of non-payment. Loans with a contractual maturity of 1 month are written off after 180 days of non-payment. The Microfinance Bank holds collateral against loans and advances to customers in the form of mortgage interest over property, other registered securities over assets, charges against receivables and guarantees. Estimates of fair value are based on the value of collateral assessed at the time of borrowing, and generally are not updated except when a loan is individually assessed as impaired. Assets written off are not subject to enforcement activity. Partial write-offs may be possible in cases where collateral security held is inadequate to expunge the debt in full.

Liquidity risk

Liquidity risk is the risk that the Microfinance Bank will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. Liquidity risk arises when assets and liabilities have differing maturities.

The liquidity risk is managed by reviewing the Microfinance Bank's liquidity profile by monitoring the difference in maturities between assets and liabilities and analysing the future level of funds required based on various assumptions, including its ability to liquidate investments and participate in money markets.

Assumptions used take into account loan collections, loan maturities, and operational costs. GetBucks's liquidity as a lending institution is dependent on the ability to collect instalments from advances made to customers. In case of shocks, delays or inability to collect instalments the Microfinance Bank relies on loan facilities from other financial institutions to ensure that it can meet its obligations.

Market risk \

This is the risk of a change in the actual or effective market value or earnings of a portfolio of financial instruments caused by adverse movements in market variables such as equity, bond and commodity prices, currency exchange rates and interest rates, credit spreads, recovery rates, correlations and implied volatilities in all of the above. The objective of market risk management is to manage and control market risk exposures within acceptable parameters while optimising the return on risk.

Foreign currency risk

The Microfinance Bank takes on exposure to the effects of fluctuations in the prevailing foreign currency exchange rates on its financial position and cash flows. Foreign exchange risk arises from having transactions and balances denominated in currencies that are not the functional and presentation currency, the 'ZWG Dollar'. The Microfinance Bank does not use hedge instruments to manage foreign currency exchange risk.

Interest rate risk

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the value of financial instruments will fluctuate because of changes in market interest rates. The Microfinance Bank's main interest rate risk arises from long-term borrowings which are issued at fixed rates. These expose the Bank to cash flow interest rate risk, which is partially offset by having a short term portfolio as the main asset in the, thereby reducing net interest expense.

Capital risk management

The Microfinance Bank's objectives when managing capital, which is a broader concept than the 'equity' on the face of the statement of

financial position, are:

- to comply with the capital requirements set by the Microfinance Banking regulators;
- to safeguard GetBucks's ability to continue as a going concern so that it can continue to provide returns for shareholders; and
- to maintain a strong capital base to support the development of its business.

GetBucks's policy is to maintain a strong capital base for investor, creditor and overall market confidence, and to sustain future development of the business. The impact of the level of capital on shareholders' return is also recognised and the Institution recognises the need to maintain a balance between higher returns that might be possible with greater gearing, and the advantages and security afforded by a sound capital position.

The Bank's capital resources should therefore be adequate to absorb losses such as operating losses, and capital losses on investments. As long as net losses can be fully offset against capital invested by the Bank's owners, the legal claims of clients or other creditors are not compromised and the Bank can continue to function without interrupting its operations.

"The shareholders' equity for the Bank at 31 December 2025 was ZWG 257 521 356 (2024: ZWG 85 012 064) which translates to USD9 912 025 (2024: USD3 295 233), and this was in compliance with the RBZ's minimum capital requirement of USD5 000 000 equivalent, after a rights issue injected USD5 000 000 equivalent on 30th April 2025."

The gearing ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including current and non-current borrowings) less cash and cash equivalents as shown in the statement of financial position. Total capital is calculated as "equity" as shown in the statement of financial position plus net debt. The gearing ratios is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including current and non-current borrowings) less cash and cash equivalents as shown in the statement of financial position. Total capital is calculated as equity as shown in the statement of financial position plus net debt.

Capital adequacy and the use of regulatory capital is monitored daily by GetBucks's management and the directors employing techniques based on guidelines developed by the Basel Committee as implemented by the Reserve Bank of Zimbabwe for supervisory purposes. The Microfinance Bank's regulatory capital is managed by management and comprises three tiers;

• Tier 1 Capital: capital representing a permanent commitment of funds by the shareholders of the microfinance bank (net of any loans and advances given to an insider) which is available to meet losses incurred without imposing a fixed unavoidable charge on the institution's earnings, and includes such of the following elements as are available to the institution after making any required deductions

(a) issued and fully paid up ordinary shares or common stock;

(b) paid up non-cumulative irredeemable preference shares;

(c) reserves consisting of

(i) non-repayable share premiums;

(ii) disclosed reserves created by a charge to net income in the financial year immediately preceding the current one;

(iii) published retained earnings for the current year, including interim earnings, where these have been verified by external auditors;

(d) minority interests in subsidiaries arising on consolidation;

• Tier 2 Capital: comprises impairment allowance, revaluation reserves, undisclosed reserves, hybrid capital instruments and subordinated term debt.

Risk weighted assets	326 392 430	255 942 625
Tier 1 Ratio	78%	32%
Tier 2 Ratio	1%	1%
Capital adequacy ratio	79%	33%

The Microfinance Bank has 3 classes of risk weighted assets. They are Credit, Market, and Operational risk assets which are components of the Capital Adequacy Ratio ("CAR") calculation. Risk weighted assets are used to determine the minimum amount of capital that must be held by banks to reduce the risk of failure. The capital requirement is based on a risk assessment for each type of bank asset. The required Tier 1 ratio is 12%, Tier 2 is 15%. This is based on operational guidelines for Deposit taking Microfinance Institutions.

Capital charges are assigned as below:

Credit risk capital

Credit risk capital is subject to guidelines provided by the regulator which are based on Basel 1 principles. On this approach the Bank's book exposures are categorised into broad classes of assets with different underlying risk characterised. Risk components are transformed into risk-weighted assets using predetermined exposure and loss probability factors. Capital requirements for credit risk are derived from the risk weighted assets.

Market risk capital

Market risk capital is assessed using regulatory guidelines which consider the risk characteristics of the different trading book assets. Risk components are transformed into risk weighted assets and, therefore, capital requirements, based on predetermined exposure and loss probability factors. Capital risk management (continued)

Operational risk capital

This is the risk of losses arising from inadequate or failed internal processes, people and/or systems or from external events. Practices to minimise operational risk are embedded across all transaction cycles. Departmental key risk indicators are used for the purpose of identifying major risks in the operating environment and methods of mitigating the risks. GetBucks employs the standardised approach to determine capital required to cover operational risk. Each function carries out a risk and control assessment of their processes on a regular basis. The assessment results are reviewed by the Executive Committee of GetBucks, and Internal Audit audits selected functions at given times.

Total capital

Total capital for the Microfinance Bank is assessed to be sufficient to support current business and planned capital projects. Growth in advances will continue to be pursued in such a way as to achieve economic asset yields.

Risk ratings

The Reserve Bank of Zimbabwe conducted an offsite inspection on the Microfinance Bank in the last quarter of 2024 and was assigned a composite rating of '4'

CAMEL RISK MATRIX-31 DECEMBER 2024 RBZ OFFSITE EXAMINATION

Composite	Capital adequacy	Asset Quality	Management	Earnings	Liquidity	Sensitivity to market risk
4	4	4	4	4	3	3

Key

1.Strong 2.Satisfactory 3.Fair 4.Substandard 5.Weak

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 31 December 2025

CAMEL* Component	**2024**
Capital Adequacy	4
Asset/Portfolio quality	4
Management, Corporate Governance and Outreach	4
Earnings	3
Liquidity and Funds Management	3

*CAMEL is an acronym for Capital Adequacy, Asset quality, Management, Earnings, and Liquidity.
CAMEL rating system uses a rating scale of 1-5, where '1' is Strong, '2' is Satisfactory, '3' is Fair, '4' is Weak and '5' is Critical.**RBS stands for Risk-Based Supervision

Additionally, the Reserve Bank of Zimbabwe conducted an onsite inspection of the Microfinance Bank in December 2025, and the results of that inspection are expected in the first quarter of 2026.

Strategic Risk

Strategic risk is the risk of a financial loss or of reputational harm arising from inappropriate strategic orientations, improper execution, or ineffective response to economic, financial, or regulatory changes. The corporate strategic plan is developed by the Senior Leadership Team, in alignment with the Bank's overall risk appetite, and approved by the Board. Once approved, the initiatives of the strategic plan are monitored regularly to ensure that they are progressing. If not, strategies could be reviewed or adjusted if deemed appropriate. In addition, the Microfinance Bank has a specific Board-approved policy for strategic investments, which are defined as purchases of business assets or acquisitions of significant interests in an entity for the purposes of acquiring control or creating a long-term relationship. As such, acquisition projects and other strategic investments are analysed through a due diligence process to ensure that these investments are aligned with the corporate strategic plan and the Microfinance Bank's risk appetite

Reputational Risk

Reputational risk is the risk that the Microfinance Bank's operations or practices will be judged negatively by the public, whether that judgment is with or without basis, thereby adversely affecting the perception, image, or trademarks of the Microfinance Bank and potentially resulting in costly litigation or loss of income. Reputation risk generally arises from a deficiency in managing another risk. The Microfinance Bank's reputation may, for example, be adversely affected by non-compliance with laws and regulations or by process failures. All risks must therefore be managed effectively in order to protect the Microfinance Bank's reputation. The Microfinance Bank's corporate culture continually promotes the behaviours and values to be adopted by employees. Ethics are at the heart of everything we do.

To fulfil our mission, put people first, and continue to build a strong Microfinance Bank, we must maintain the highest degree of work ethic. Our Code of Conduct outlines what is expected from each employee in terms of ethical behaviour and rules to be followed as they carry out their duties.

Legal and compliance risk

Legal and compliance risk is the risk that arises due to the Microfinance Bank's failure to adhere to legal and regulatory obligations. The Microfinance Bank manages this risk through dedicated Legal and Compliance units, and deliberations by its Board Risk and Compliance Committee. However, during the year, the Microfinance Bank was fined US$20,300 by the Reserve Bank of Zimbabwe on 27th February 2025 for failure to submit regulatory returns and information. In the prior year, the Microfinance Bank was also fined US$7,000 by the Reserve Bank of Zimbabwe on 26 September 2024, for the late publication of unaudited financial statements for the half year ended 30 June 2024.

Risk Assessment System ("RAS")

Summary RAS -Ratings

RAS Component	**2024**
Overall Inherent Risk	Moderate
Overall Risk Management System	Moderate
Overall Composite Risk	Moderate
Direction of Overall Composite Risk	Stable

Interpretation of risk matrix level of inherent risk
Low - reflects lower than average probability of an adverse impact on a banking institution's capital and earnings. Losses in a functional area with low inherent risk would have little negative impact on the banking institution's overall financial condition.

Moderate - could reasonably be expected to result in a loss which could be absorbed by a banking institution in the normal course of business.

High - reflects a higher-than-average probability of potential loss. High inherent risk could reasonably be expected to result in a significant and harmful loss to the banking institution.

Risk Matrix Summary Type of Risk	Level of Inherent Risk	Adequacy of risk management systems	Overall composite risk	Direction of composite risk
Strategic Risk	Moderate	Acceptable	Moderate	Stable
Credit Risk	High	Acceptable	High	Increasing
Liquidity Risk	Moderate	Acceptable	Moderate	Stable
Interest Rate Risk	Moderate	Acceptable	Moderate	Stable
Foreign Exchange Risk	Moderate	Acceptable	Moderate	Stable
Operational Risk	Low	Acceptable	Low	Decreasing
ICT & Cyber Risk	High	Acceptable	High	Increasing
Legal Risk	Low	Acceptable	Low	Decreasing
Reputational Risk	Low	Acceptable	Low	Decreasing
Compliance Risk	Moderate	Acceptable	Moderate	Stable
OVERALL RATING	MODERATE	MODERATE	MODERATE	MODERATE

Adequacy of risk management systems
Weak - risk management systems are inadequate or inappropriate given the size, complexity and risk profile of the banking institution. GetBucks's risk management systems are lacking in important ways and therefore a cause of more than normal supervisory attention. The internal control systems will be lacking in important aspects, particularly as indicated by continued exceptions or by the failure to adhere to written policies and procedures

Acceptable - management of risk is largely effective but lacking to some modest degree. While the institution might be having some minor risk management weaknesses, these have been recognised and are being addressed. Management information systems are generally adequate.

Strong - management effectively identifies and controls all types of risk posed by the relevant functional areas or per inherent risk. The Board and senior management are active participants in managing risk and ensure appropriate policies and limits are put in place. The policies comprehensively define the Bank's risk tolerance. Responsibilities and accountabilities are effectively communicated.

Overall composite risk

Low - would be assigned to low inherent risk areas. Moderate risk areas may be assigned to a low composite risk where internal controls and risk management systems are strong and effectively mitigate much of the risk.

Moderate - risk management systems appropriately mitigate inherent risk. For a given low risk area, significant weaknesses in the risk management systems may result in a moderate composite risk assessment. On the other hand, a strong risk management system may reduce the risk so that any potential financial loss from the activity would have only a moderate negative impact on the financial condition of GetBucks.

High - risk management systems do not significantly mitigate the high inherent risk. Thus, the activity could potentially result in a financial loss that would have a significant impact on the Bank's overall condition.

Direction of overall composite risk

Increasing- based on the current information, risk is expected to increase in the next 12 months.

Decreasing - based on current information, risk is expected to decrease in the next 12 months.

Independent credit rating

In June 2025, the Microfinance Bank was externally evaluated based on an ISO 9001:2015 standard, independent methodology for financial institutions, and given a credit rating of BB.

26 Contingent liabilities

There were no contingent liabilities as at as at 31 December 2025 (31 December 2024: nil).

27 Capital commitments

There were no authorised and contracted or authorised but uncontracted capital expenditure as at 31 December 2025 (31 December 2024 : nil).

28 Going concern

The Directors believe that the Microfinance Bank has adequate financial resources to continue in operation for the foreseeable future and accordingly the financial statements have been prepared on a going concern basis. The Directors have satisfied themselves that the Bank is in a sound financial position and has access to sufficient financing facilities to meet its foreseeable cash requirements.
There are no material changes that may adversely impact the Microfinance Bank, and there has not been any material non-compliance with statutory or regulatory requirements, nor are there any pending changes to legislation which may affect the going concern.

29 Events after the reporting date

There were no subsequent events requiring disclosure or recognition in the audited financial statements.

30 Corporate Governance

GetBucks Microfinance Bank Limited adheres to governance practices as stipulated by the Companies and Other Business Entities Act, the Reserve Bank of Zimbabwe Operational Guidelines, and the King V Code. The Board has set up the Audit and Risk Committee, Remuneration Committee, Credit Committee, Loans Review Committee and the Nominations Committee to assist in the discharge of its duties and responsibilities.

Following the issue of Prudential Standard No.02-2025/BSSFS: Corporate Governance - Guideline No. 1 by the Reserve Bank of Zimbabwe in June 2025, as well as SI 85 of 2025 Microfinance (General) Regulations, the board committees were reconstituted effective 1st September 2025 as follows:

Before	After
• Audit and Risk Committee • Loans Review Committee • Credit Committee • Remuneration	• Audit Committee • ·Risk Committee • Loans Review Committee • Credit Committee • Remuneration Committee • Nominations Committee

This is to better assist the Board to discharge its responsibilities by having more oversight and supervision of the Bank and its operations. The Board has also appointed management committees to assist in the execution of its mandate, namely, the Asset and Liability Committee ('ALCO') and the Executive Committee ('EXCO').

Audit and Risk Committee

The Committee oversees the Bank's financial reporting process, monitoring the integrity and appropriateness of the Bank's financial statements, evaluating the adequacy of GetBucks''s financial and operational processes, compliance, internal controls and risk management processes and the selection, compensation, independence and performance of the Company's external and internal auditors. The Committee's mandate was to meet at least four times a year, and regularly with the internal and external auditors.

This Committee was split to separate the audit and risk functions of the board and provide improved oversight of the Bank's operations. For independence and objectivity, both internal and external auditors have unrestricted access to the Committee(s).

Loans Review

The Loans Review Committee assesses compliance of the loan book with the lending policy and regulations. The Committee conducts loan reviews independent of any person or Committee responsible for sanctioning credit.

Credit Committee

The Credit Committee's main responsibilities are to consider loan applications beyond the discretionary limits of the Executive Credit Committee and to direct the formulation of, review and monitor the credit principles and policies of the Microfinance Bank.

Remuneration Committee

The Committee is responsible for setting GetBucks's remuneration philosophy and reviews the overall remuneration structures of the GetBucks's, including all material remuneration proposals and packages for Executive Directors and senior personnel.

Nominations Committee

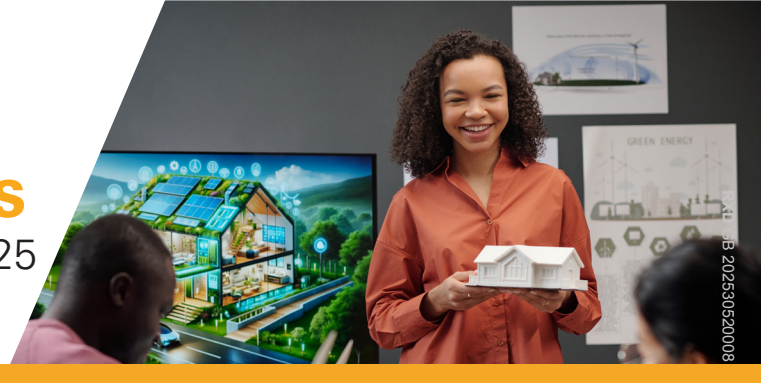
The Committee identifies individuals suitably qualified to become members of the board or senior management of the Microfinance Bank, selecting (or making recommendations to the board) on the selection of individuals nominated, based on the role and requisite responsibilities, as well as the knowledge, experience, skills and competence which a particular role requires. The Committee also undertakes board performance evaluation to assist the board in reviewing the efficiency and effectiveness of the functioning board.

Executive Committee

The Executive Committee is the operational management forum responsible for the delivery of the Bank's operational plans. It acts as a link between the Board and management and is responsible for implementation of operational plans, annual budgeting and periodic review of strategic plans, as well as identification and management of key risks. The Executive Committee is made up of the Managing Director, Finance Director, Head Treasury, Head of Risk, and Company Secretary.

Abridged Audited Financial Statements

For the year ended 31 December 2025



30.1 Directors

The directors in office during the year and at the date of this report are as follows:

Directors	Position	Nationality	Changes
Mr. Innocent Chagonda	Non-Executive Chairperson (Independent)	Zimbabwean	No changes
Mr. Gamuchirai Nyamuzinga	Non-Executive Director (Independent)	Zimbabwean	No changes
Ms. Shaleetha Mahabeer	Non-Executive Director	Zimbabwean	No changes
Mr. Edwin Chavora	Managing Director	Zimbabwean	No changes
Mr. Gabriel Chiome	Finance Director	Zimbabwean	Resigned May 2025
Mr. Batsirai Dembetembe	Finance Director	Zimbabwean	Appointed June 2025
Mr. Dipesh Shah	Non-Executive Director	Zimbabwean	Appointed October 2025

30.3 Board and Directors evaluation

The Board is required to conduct an annual evaluation process which assesses the performance and effectiveness of individual directors, the Board Chairperson, Committees and overall performance of the Board. Every Board member is expected to make an assessment of the quality of board oversight. Board members also perform peer review of each member in addition to the individua member review done by the Chairperson of the Board. This will be performed in the first quarter of 2026 by the Nominations Committee.

30.4 Directors' interests in contracts

During the financial year, no contracts were entered into where directors or officers of GetBucks had an interest and which significantly affected the business of GetBucks.

30.5 Holding Company

The Bank's holding Company is Ever Prosperous Worldwide Limited which holds 99.66% (2024: 99.16%) of the Microfinance Bank's equity. The transaction was conditionally approved by the Registrar of Microfinance Institutions in May 2023, and the Microfinance Bank was in April 2025 given up to 31 March 2028 to regularise this position.

By Order of The Board

Mr. Muchineripi Chigwendere (Company secretary).
Registered Office: First Floor, Unity Court Building, 64 Union Avenue, Harare, Zimbabwe.
